IOM VISION

IOM, in coordination with humanitarian and development partners, seeks to support the people of Myanmar through the provision of essential and life-saving multi-sectoral assistance to crisis-affected populations, while building local capacities for response and recovery. Recognizing the complex mobility dynamics and cross-border implications of the crisis, IOM aims to provide data and analysis on mobility and needs to the wider humanitarian community and will continue to coordinate to ensure that preparedness actions and targeted response capacities are in place and strengthened.

IOM PROPOSED RESPONSE

OBJECTIVE	FUNDING REQUIRED	PEOPLE TARGETED
Save lives and respond to needs through humanitarian assistance and protection	21,800,000	490,000
Address the drivers and longer term impacts of crises and displacement through investments in recovery and crisis prevention	6,150,000	75,000
Strengthen preparedness and reduce disaster risk	2,000,000	56,000
Contribute to an Evidence Based and Efficient Crisis Response System	7,250,000	150,000

PRIMARY TARGET GROUPS

1. Internal migrant
2. Internally displaced person
3. International migrant
4. Local population / community

BREAKDOWN OF FUNDING REQUIREMENTS (USD) 2023

OBJECTIVES AND ACTIVITY AREAS	2023
Save lives and respond to needs through humanitarian assistance and protection	
Basic Needs, including Food	5,000,000
Camp Coordination and Camp Management	500,000
Direct Health Support	8,700,000
Mental Health and Psychosocial Support in Humanitarian Response	900,000
Protection	1,300,000
Shelter, Settlements and Non-Food Items	2,800,000
Provision of Water, Sanitation and Hygiene in Emergencies	2,600,000
Address the drivers and longer term impacts of crises and displacement through investments in recovery and crisis prevention	
Community stabilization	5,650,000
Durable Solutions	500,000
Strengthen preparedness and reduce disaster risk	
Health Components of Preparedness and Risk Reduction	2,000,000
Contribute to an Evidence Based and Efficient Crisis Response System	
Displacement Tracking	2,250,000
Support Services for Response Actors	5,000,000
TOTAL FUNDING REQUIRED	37,200,000

2023 - Myanmar Crisis Response Plan 2023

CONTEXT ANALYSIS

Almost two years since the military takeover in February 2021, the economic, political, and social crisis in Myanmar has become more complex, with no signs of resolution. Myanmar faces acute humanitarian needs, public infrastructure and services have deteriorated with the departure of personnel who have joined the civil disobedience movement (CDM), and as the country faces the consequence of global crises - including but not limited to rising inflation and prices for basic commodities.

Conflict-related displacement continues unabated, with 1.1 million people having been forced to flee their homes since February 2021, out of 1.4 million total displaced in the country. The highest rates of displacement are in the North-West, where 770,400 people remain displaced since February 2021, of which 612,400 are in Sagaing region alone ([OCHA, 2022](#)). Active conflict and clashes also continue in the South-East where just under 300,000 people remain displaced. In these locations, families experience repeated, short-term displacement, moving to avoid armed actors, often in hard-to-reach forest areas. There are frequent reports of arson attacks against villages, leading to widespread destruction of homes, public buildings and personal as well as livelihood assets.

Protection risks are grave, with increasing incidents of injuries due to explosive remnants of war, regular reports of arbitrary arrests and detention, as well as greater risks of domestic, gender-based violence and exploitation and abuse against the backdrop of increasing lawlessness and limited means for accessing formal justice systems. In Rakhine, clashes have recently intensified, resulting in 20,000 newly displaced as of September 2022. Security measures have also been imposed, limiting the movement of people and goods. Humanitarian access is a challenge due to several factors - including operational impediments imposed by authorities, hard-to-reach rural, mountainous, or jungle areas people are displaced to, as well as conflict-related insecurity leading to roadblocks, checkpoints and travel restrictions.

The economic downturn due to COVID-19 and the political turmoil has resulted in increasingly complex and mixed population movements, both internally and internationally, including regular and irregular cross-border movements between Myanmar and neighbouring countries in both directions. Amongst these overall flows, the proportion of migrants migrating from or returning to conflict-affected contexts (including to/from a situation of existing displacement) has increased. Disrupted livelihoods, deteriorating economic and security conditions, and increasing mobility have also increased protection risks and vulnerabilities, as people resort to unsafe and high-risk migration strategies, posing greater risk of trafficking, exploitation or abusive recruitment practices, including from displacement sites such as camps. As of October 2022, IOM estimates that approximately 40,000 Myanmar nationals are leaving the country monthly for conflict-related but also economic and other reasons, through a range of regular and irregular pathways, with the majority migrating to Thailand.

In 2023 displacement is expected at a similar or higher rate as a result of the ongoing or worsening conflict. Humanitarian space is also expected to worsen, with increased scrutiny on humanitarian organizations. Public health and education services will likely continue to be disrupted, including services related to COVID-19, with protection risks increasing. The Financial Action Taskforce's "call for action" blacklisting of Myanmar in October 2022 will likely further disrupt banking services and impact the financial flows into the country. Planned elections in 2023 could result in additional widespread insecurity and subsequent clampdown by the Myanmar Armed Forces, while de facto authorities are expected to push for camp closures and forced returns.

With high vulnerability and low readiness, Myanmar is ranked as one of the world's most at-risk countries for climate change. The country ranks 156 out of 182 countries on the Notre Dame Global Adaptation Initiative Index on climate vulnerability. Myanmar continues to be at risk for disasters due to natural hazards, such as tropical storms, cyclones, and earthquakes. The country is also vulnerable to sea level rise and as the majority of the population relies on agricultural livelihoods which are climate-sensitive, additional action is urgently required on adaptation.

COORDINATION

IOM is an active member of the Humanitarian Country Team and related humanitarian coordination mechanisms at the national level, as well as at state and regional levels in the North-East, Rakhine, South-East and North-West. IOM engages with the Inter-Cluster Coordination Group to coordinate inter-sectoral humanitarian response and recovery activities, and participates in numerous humanitarian clusters and working groups at national and sub-national levels. This includes food security, shelter/non-food items/camp coordination and camp management, health, and protection clusters, as well as relevant working groups, including the child protection working group. Further, IOM coordinates cash assistance closely with the Cash Working Group, to ensure that approaches are harmonized whenever feasible and possible. IOM also coordinates activities through the UN Country Team (UNCT) and is an active contributor to the Myanmar Health Response Contingency Framework and the Socioeconomic Resilience Response Plan (SERRP), advocating for the mainstreaming of migration and mobility considerations across response activities. In addition, IOM co-chairs the Human Trafficking Working Group with the United Nations Children’s Funds (UNICEF), facilitating information-sharing and coordination of responses to human trafficking across the country. IOM works closely across borders and at regional and sub-regional levels to ensure a coordinated response to the needs of Myanmar migrants and to better understand mobility dynamics, including those of returning populations. Internally, IOM coordinates closely with the IOM Thailand office regarding issues affecting migrants and refugees from Myanmar and cross-border issues, as well as with the Regional Office in Bangkok and Headquarters in Geneva.

IOM CAPACITY

IOM has been operational in Myanmar since 2005, with over 250 IOM staff members, over 30 staff under third-party contracts and more than 500 community-based volunteers. IOM has a country office in Yangon, a liaison office in Nay Pyi Taw, 21 sub-offices and satellite/field offices and nine Migrant Resource Centres (MRCs) across the country. Operational capacities and presence are further supported through long-established collaboration with a broad range of partners, including community-based organizations (CSOs), non-governmental organizations (NGOs), faith-based organizations, community-based organizations (CBOs), private sector and ethnic health and welfare organizations. While considering safety, security and duty of care to field teams and partners, IOM is particularly well-positioned to support areas of emerging need in the North-West and South-East, given the challenges (under the present circumstances) for new actors to establish partnerships, presence and operations in these locations. IOM has been operational and providing either direct assistance or assistance through partners in Saigaign, Magway and Chin, since 2017. In addition, IOM has been working in the South-East since 2005, including in hard-to-reach areas with ethnic minority populations near the Myanmar-Thai border. IOM also has vast experience in providing support to internally displaced persons and affected communities in Rakhine state and has a substantial presence in Yangon to respond to the needs of urban displaced populations and vulnerable migrants. IOM supports accountability to affected populations (AAP) during project design and planning, implementation, monitoring and evaluation and further adopts conflict-sensitive approaches throughout the programme cycle, ensuring that interventions do not unintentionally contribute to conflict and instead strengthen opportunities for peace and inclusion. IOM also adopts strong protection mainstreaming across all sectors of intervention, to ensure that partners and teams on the ground have the basic capacity to identify, report and refer protection incidents and assist beneficiaries in need of protection services, in coordination with local networks, partners, communities and religious groups. All IOM interventions mainstream capacity building and technical support to local CSOs/CBOs and community-led initiatives, to increase sustainability and ensure a high degree of local ownership and influence in the design, planning and implementation of programming.

SAVE LIVES AND RESPOND TO NEEDS THROUGH HUMANITARIAN ASSISTANCE AND PROTECTION

Funding Required
\$21,800,000

People Targeted
490,000

People Targeted Description

IOM’s humanitarian assistance will target internally displaced persons (IDPs), including protracted IDPs and those newly displaced, as well as those re-displaced, in all settings (camps, camp-like settings, informal sites in host communities and other out-of-camp displacement sites). Furthermore, assistance will be provided to returnees, resettled and integrated IDPs, as well as other crisis-affected people with humanitarian needs, such as those affected by disasters, host communities, people living in conflict areas with limited access to basic services, people with severe protection needs, including victims of trafficking and the most vulnerable migrants. Vulnerable migrants in this context will include those who have experienced exploitation, trafficking or abuse as part of their migration; those who have been forced to return home, especially to conflict-affected locations, without prior planning, due to COVID-related restrictions, job losses, as well as conflict; as well as individuals who may adopt unsafe migration as a coping strategy to escape the many hardships resulting from the current crisis, including many displaced populations. IOM will also upscale partnerships with a range of non-

governmental actors, including CSOs and community-based actors, and will provide training/technical assistance as well as material support to strengthen local response capacities.

BASIC NEEDS, INCLUDING FOOD

IOM Myanmar, in close coordination with relevant clusters and the cash working group, will assist IDPs and vulnerable communities affected by conflict or disasters with targeted and tailored food, emergency livelihoods and/or cash assistance based on identified needs. This will include:

- Provision of in-kind food assistance in locations where this is an identified needs of the community and IOM has a comparative advantage with regards to access, taking into account market access and the affordability, availability and accessibility of food.
- Provision of multi-purpose cash assistance as part of a mixed modality approach in locations where this is the preference of communities, and where there is market accessibility, functionality and affordability of key items identified as part of needs assessment

Funding Required
\$5,000,000

CAMP COORDINATION AND CAMP MANAGEMENT

IOM Myanmar will support safe living conditions for displaced populations through participatory site planning, environmentally conscious construction and site maintenance initiatives as well as camp coordination and camp management support to local actors. This will include:

- Support to enhanced community engagement, coordination, complaint and feedback mechanisms, monitoring and referrals for displaced and host populations both in and out of camp-like settings.
- Provision of site improvement support in IDP sites, including concrete pathways, wooden bridges, repairs and construction of communal facilities (such as WASH facilities, community centres, and health facilities) through cash-for-work initiatives, in coordination with the cash working group, and technical support.

Funding Required
\$500,000

IOM will work with site focal points and volunteers to ensure maintenance, as relevant, and work in coordination with the shelter/NFI/CCCM cluster to ensure complementary approaches, as well as adherence to cluster-led prioritization initiatives.

DIRECT HEALTH SUPPORT

IOM Myanmar, in close coordination with the health cluster and other relevant stakeholders, will provide direct healthcare services to populations affected by crises and disruptions to regular health services, through mobile clinics and support to static facilities, including in ethnic and hard-to-reach areas. This will include:

- Provision of essential integrated health services, including primary health care, sexual, reproductive, maternal, neonatal, child, and adolescent health services, life-saving referrals, and comprehensive, rights-based gender and health services and to provide linked outreach activities, including health promotion and education.
- Support to emergency referrals to secondary care with a focus on maternal and child health and major life-threatening emergencies as well as for survivors of Gender-Based Violence.
- Strengthening capacity to prevent, detect and respond to disease outbreaks through the establishment of health surveillance for early outbreak detection and response at the community level including the collection, processing, analysis, and dissemination of critical health information, and early outbreak response and containment.
- Expansion of the coverage of tuberculosis, HIV and malaria programs using regular delivery channels such as health facilities, mobile clinics as well as community-based approaches and adapted service delivery models to critical

Funding Required
\$8,700,000

situations, as well as scaling up rapid case findings to identify cases missed and to provide diagnoses and treatment in alternative ways during the ongoing crisis.

- Continuation of ongoing COVID-19 prevention, diagnosis, treatment and vaccination support, working towards implementation of public health measures, increased testing, strengthened disease surveillance, and management of mild and asymptomatic cases in facilities as well as through home-based care and reinforced by ongoing efforts to disseminate health messages and promote awareness of COVID-19 risks and prevention.

MENTAL HEALTH AND PSYCHOSOCIAL SUPPORT IN HUMANITARIAN RESPONSE

In line with [IOM's Manual on Community-Based Mental Health and Psychosocial Support in Emergencies and Displacement](#), IOM Myanmar, in close coordination with relevant clusters and working groups, will support increased access to mental health and psychosocial support (MHPSS), including through enhanced local capacity. This will include:

Funding Required
\$900,000

■ IOM

- Capacity strengthening of partners, CSOs, medical staff and representatives of community initiatives in the provision of individual and community-based MHPSS services, including training of counterparts in psychological first aid (PFA), the establishment of psychosocial mobile teams, support to individuals and group counselling, recreational activities as well as strengthening referral pathways to specialized mental health services.
- Establishment of psychosocial mobile teams to provide individual and group lay counselling, referrals and support recreational and social activities, such as arts and sports activities, support to community groups, and so forth, with displaced and other affected communities, and support with the distribution of IEC materials.
- Adaption and distribution of MHPSS information, education and communication materials, targeting the needs of people of all ages and genders, people with disabilities, and frontline workers, on coping and stress management to promote psychosocial well-being and maintain mental health.
- Mainstreaming of MHPSS across all IOM activities, for example through the training of distribution staff in PFA.

PROTECTION

IOM will support enhanced access to survivor-centred protection services at the individual and community level and improved community-based protection mechanisms and coordination among service providers to ensure effective referrals and support to survivors, in line with the [Institutional Framework for Addressing Gender-Based Violence in Crises](#). This will include:

Funding Required
\$1,300,000

■ IOM

- Providing specialized assistance to vulnerable groups such as victims of trafficking, exploitation or abuse and GBV survivors, and persons with disabilities through individualized protection assistance, psychological first aid, legal aid (including through assistance with court appearances, documentation and with remedial action against trafficking, exploitation and abuse), counselling, parenting support, cash, NFIs and dignity kits, including through safe shelters.
- Implementing awareness-raising activities on GBV and trafficking, in close coordination with and complementing activities implemented under the Health components of preparedness and risk reduction activity area.
- Mapping service providers and strengthening referral pathways in areas of intervention.
- Strengthening and mainstreaming human trafficking response capacity and measures amongst humanitarian actors, particularly local partners, including through the protection cluster, the GBV and child protection Areas of Responsibility (AoRs), and the MHPSS Working Group. This will include the provision of capacity building and technical tools to support partners to identify and respond to cases of TIP and the needs of trafficked victims, strengthening

the monitoring of rights trafficking in persons and associated rights violations through incorporation into protection monitoring; and, incorporation of trafficking prevention activities including awareness-raising, risk communication and community engagement on trafficking and safe migration into humanitarian response activities, particularly through community-based protection initiatives, in areas of high risk such as the North West.

Protection will be mainstreamed across all sectors and activities to ensure that IOM and partner teams are providing assistance and support while upholding protection principles and promoting meaningful access, accountability and safety in their programs. IOM and partner teams will also receive guidance on how to safely refer vulnerable individuals or families to Protection teams or other support services that they engage with in the course of their distributions or activities.

SHELTER, SETTLEMENTS AND NON-FOOD ITEMS

IOM Myanmar, in close coordination with the shelter/NFI/CCCM cluster, cash working group and other relevant working groups, will provide life-saving emergency shelter/non-food items support to households affected by conflict or disaster. This will include:

- Supporting the repair of shelters and construction of shelter units in IDP sites, based on needs assessments.
- Distributing NFIs, including fuel-efficient stoves and fuel, tailored based on the needs of communities as well as market assessments, to conflict and disaster-affected communities, with consideration of the varied realities of displaced populations, including some facing repeated, short-term displacement.
- When feasible and appropriate, providing assistance via cash or vouchers, instead of in-kind.

Funding Required
\$2,800,000

PROVISION OF WATER, SANITATION AND HYGIENE IN EMERGENCIES

IOM Myanmar, in coordination with the WASH cluster, will support improved equitable access to regular and sufficient safe water for drinking and domestic use, increased availability of appropriate and accessible sanitation facilities and improved hygiene practices. This will include:

- Supporting the rehabilitation of key WASH infrastructure at IDP sites, as well as increasing the availability of handwashing stations in conflict-affected areas.
- Conducting solid waste cleaning campaigns in small IDP sites through cash for work, when appropriate.
- Guiding and training IDP site and community volunteers on how to support the maintenance of facilities.
- Distributing critical WASH supplies (hygiene kits, menstrual hygiene management kits, jerry cans, and water purification tablets), accompanied by hygiene promotion activities, including materials and community outreach to conflict-affected communities.
- Pre-positioning critical WASH supplies to respond to outbreaks of acute watery diarrhea or other water-borne diseases.
- Supporting the local manufacture of reusable sanitary pads in Rakhine.
- Mitigating water shortages in the dry season through improved accessibility and quantity of water for domestic use and drinking from shared community-managed ponds and water trucking in the peak dry season.

Funding Required
\$2,600,000

ADDRESS THE DRIVERS AND LONGER TERM IMPACTS OF CRISES AND DISPLACEMENT THROUGH INVESTMENTS IN RECOVERY AND CRISIS PREVENTION

Funding Required
\$6,150,000

People Targeted
75,000

People Targeted Description

Activities under this objective will target conflict-affected communities as well as internal and international migrants returning to communities of origin in crisis-affected areas, aspiring migrants and returnees with plans to re-migrate, migrant-sending/receiving households, migrants in vulnerable situations and IDPs. IOM will implement activities in close collaboration with community-based actors, CSOs and private sector partners to encourage local ownership and sustainability.

COMMUNITY STABILIZATION

IOM Myanmar aims to strengthen the cohesion, stability and resilience of conflict-affected communities by facilitating access to services, supporting basic community infrastructure, expanding livelihoods opportunities for migrants and migrant-sending communities in crisis-affected areas, and promoting safe migration practices. Activities will include:

- Support to participatory community-led prioritization and planning of small-scale community projects through community committees responsible for the implementation and oversight of agreed projects. Projects may include access to safe education, markets, health, WASH services, including through repair and construction of roads, bridges, public buildings, medical centres and schools, as well as through installation of solar light sources.
- Scale up employment and livelihood interventions including skills development, cash-for-work, business and entrepreneurship development, coaching, job-matching and access to finance to strengthen socioeconomic resilience and reduce reliance on unsafe migration practices and reduce risks of exploitation and migrants getting caught in the crisis.
- Implement projects for youth and women’s empowerment through the creation of youth and women dedicated spaces and provision of supplies and equipment for activities selected by youth and women through community engagement, such as sports equipment, events equipment, as well as capacity building support in establishing and managing of youth and women representative groups.
- Conduct information campaigns and provide counselling and referrals through community-based outreach and migrant resource centres to enhance knowledge of migrants’ rights and access to information on safe migration, risks of irregular migration and positive migration practices.

Funding Required
\$5,650,000

- Provision of support to civil society organizations (CSOs)/community-based organizations (CBOs) to implement art and cultural projects, such as mobile theatre, poetry readings and peace concerts.
- Provision of organizational and capacity development support to CSO partners, as well as technical and financial support to sustain and strengthen existing community-based mechanisms that promote meaningful and effective access to services.

DURABLE SOLUTIONS

In line with [IOM's Progressive Resolution to Displacement Situations Framework](#), IOM Myanmar plans to support displaced populations returning to their place of origin, settling elsewhere, or locally integrating in their place of displacement to re-establish their livelihoods and access services as well as to promote social cohesions in communities of return, resettlement or local integration. Activities will include:

- Linking with Population Mobility and Needs Tracking, gather information on return flows, needs of returnees and return communities, and the situation in areas of return to inform programming for durable solutions.
- Undertake surveys on the intentions of displaced households and individuals with regards to return, resettlement and local integration.
- Implement community-based activities in communities of return, resettlement or local integration utilizing community-based planning methodologies, such as the rehabilitation of small-scale community infrastructure that increases the access of the whole community to an adequate standard of living, including housing, access to adequate water, sanitation, and hygiene services, health services and education.
- Provide capacity-strengthening support for local service providers, such as health clinics.
- Provide individual or household level support to the most vulnerable displaced populations who have returned, resettled or intend to locally integrate to increase their access to livelihoods, such as vocational training, business start-up grants, and similar, based on identified priorities and available value chains.
- Support livelihoods assistance, such as skills building, business coaching, grants and targeted agricultural support in locations with protracted displacement and/or where there is relative stability in terms of conflict dynamics.
- Support income generation for displaced populations who have returned, resettled or intend to locally integrate through cash for work for community projects, whenever possible.
- Support the development, establishment and strengthening of local protection mechanisms to improve the overall safety and security of areas of return, integration, or settlement.

Funding Required
\$500,000

STRENGTHEN PREPAREDNESS AND REDUCE DISASTER RISK

Funding Required
\$2,000,000

People Targeted
56,000

People Targeted Description

IOM will target a range of non-governmental actors, including CSOs, community-based actors, local volunteer groups, ethnic health organizations and other local organizations in border communities and migrant-dense areas, vulnerable mobility corridors and displacement sites. Migrants and mobile populations will be directly and indirectly supported through preparedness measures developed and strengthened under this objective. In addition to people and entities targeted directly, IOM expects to reach an additional 56,000 individuals and 30 entities indirectly.

HEALTH COMPONENTS OF PREPAREDNESS AND RISK REDUCTION

Funding Required

To contribute to preparedness measures related to public health threats in communities, at borders and along vulnerable mobility corridors, IOM will assess ad hoc and local level arrangements implemented by CSO staff, volunteers and other actors to prepare for, identify and respond to public health risks, and to identify good practices and areas for further capacity building and support. Activities will include:

\$2,000,000

- Capacity-building of mobile health teams and key partners, such as CSOs/ CBOs, community-based health workers, village health committees and community support groups (including youth groups, and mother support groups), to ensure the provision of quality essential health services in ethnic and hard-to-reach areas.
- Strengthening the overall awareness of GBV concepts and referral pathways, building on, strengthening and complementing activities under protection, including through training of youth peer educators to raise awareness of sexual and reproductive health, as well as GBV.
- Supporting local groups and partners to develop local health emergency preparedness plans to ensure and strengthen that health systems are prepared for a range of emergency situations including natural or man-made disasters and disease outbreaks.
- Supporting existing disease surveillance systems, including community event-based surveillance, and dissemination of critical health information and awareness of displaced and vulnerable populations, particularly in border communities, migrant-dense areas and displacement sites.
- Strengthening data collection on public health risks and mobility dynamics to inform preparedness and response plans, using IOM's population mobility mapping tool, while coordinating with relevant stakeholders to ensure migration and mobility are adequately considered in preparedness planning, and that public health/hygiene messaging contributes to countering misinformation and anti-migrant sentiments.
- Working with CSOs to identify/assess any vaccine hesitancy or health misinformation from communities to reinforce risk communication and community engagement efforts.

CONTRIBUTE TO AN EVIDENCE BASED AND EFFICIENT CRISIS RESPONSE SYSTEM

Funding Required

\$7,250,000

People Targeted

150,000

People Targeted Description

IOM's activities under this objective will target humanitarian, development and peace partner organizations, as well as other relevant actors, who will be provided with information on human mobility, living conditions, and related multi-sectoral needs, enabling them to have a better understanding of the displacement and mobility situation in the country and contributing to improved, evidence based response planning and implementation. Data will be shared taking into account risks associated with data collection and dissemination in the country IOM will provide access to humanitarian services to crisis-affected individuals, including IDPs, host community members and returnees, through the disbursement of funding and capacity strengthening of local NGOs and CBOs, targeting 150,000 individuals directly and 100,000 indirectly.

DISPLACEMENT TRACKING

IOM will support the wider humanitarian system by providing regular data on displacement, population mobility, and multi-sectoral needs at the community, regional and national levels. Community-level information on movements and intentions of IDPs, returnees and host communities, as well as internal and international migrants, including the drivers and triggers of mobility, will be made available to all humanitarian, development and peace partners, and other relevant actors, in line with data protection principles, to inform evidence-based planning and response. Activities will include:

Funding Required

\$2,250,000

- Generation of Baseline Area Population and Multi-sectoral Needs Profiles

(Population Mobility and Needs tracking) on a monthly basis, to establish baseline information of affected populations in original communities, host communities, IDPs and IDP returnees across accessible areas. Information gathered will include estimates of target groups per each administrative area.

- Production of Baseline Location Profiles on a quarterly basis, based on the information generated through the Baseline Area Profile. This process will collect additional data such as priority needs, access to services, intentions and so forth.
- Development of Baseline Site Profiles, based on the Baseline Location Profiles, conducted through key informant interviews, and direct observations either onsite or through local community focal points.

SUPPORT SERVICES FOR RESPONSE ACTORS

IOM plans to support localization and improve access of humanitarian actors to populations in need by providing capacity building and financial support to local actors in Myanmar. Activities will include:

- Establishment of a flexible and needs-based rapid response fund (RRF) for Myanmar, focusing on areas of high displacement and needs, to support local actors, including volunteer groups, local associations, community-based organisations and networks of local NGOs, in the provision of immediate humanitarian assistance to displaced populations and affected communities.
- Provision of organizational and capacity development support to CSO partners, as well as technical and financial support to sustain and strengthen existing community-based mechanisms that promote access to services.
- Provision of trainings to partners on preventions of sexual exploitation and abuse (PSEA), and accountability to affected populations (AAP), and other relevant trainings.

Funding Required
\$5,000,000
